

Fume Extractor

DIKAI XL500II/700II

LASERFUMEGO®

DIKAI XL Series fume extractors are specially designed for laser marking applications. All three models have longer life, high quality. And can continuously operating under high pressure and harsh environment to provide filtering effect.

With DIKAI XL Series fume extractors can protect the health of workers and keep the workshop avoid the dusty and dirty environment which will greatly help produce clean and safe products.

Ensure both smoke and odors are eliminated quickly

- * Metal frame structure, durable to use.
- * Microchips inside for operation; Digital display; Remote control.
- * Filter failure alarm.
- * Multiple filters to make sure rapid purification.
- * Adopting brushless DC motor, stable performance, long life.
- * Using impeller made of composite material to prevent anticorrosion, stable operation and large air absorption.
- * Dust collection and filtration, odor filtration.

Model		XL-500II	XL-700II
Flow		640 M ³ /H	750 M ³ /H
Filter	Stainless steel fireproof net	388*230*50 MM	388*230*50 MM
	Organ filter bag	267*380 MM; 18 Plies	410*380 MM; 18 Plies
	Integrated metal filter	450*350*300 MM	450*350*300 MM
Noise		<62 dB	<65 dB
Power		450 W	700 W
Weight		80 KG	100 KG
Dimension		665*490*985 MM	665*490*1135 MM
